

Computer Forensics Summer Camp

Location: Columbia-Montour Vo-Tech School

July 27th – 31st [9:00 a.m. – 2:00 p.m.]

Fee: \$35

(For students entering 8th grade next school year)

Computer forensics is a new and fast growing form of investigative technique in which a forensic specialist gathers data that has been electronically stored on digital media (computers, flash drives, mp3 players, etc.). This camp will introduce students to possible careers in the field, and allow them to explore what forensic specialists do on a daily basis. There will be hands-on labs using popular forensic software to recover delete files and messages, and track Internet usage on the lab PC's.

If you like computers, have an inquisitive mind, and any of the above sounds interesting to you, fill out the registration form below and mail it (along with a \$35 check for registration) to:

Mr. Chuck Greco
Columbia-Montour AVTS
5050 Sweppenheiser Dr.
Bloomsburg, PA 17815

Note: *This camp is for students entering the 8th grade next school year, and attends a public or private school in the Columbia or Montour counties. Lunch will be provided daily. Questions? Email cgreco@cmvt.us*
